Course description

This seminar will provide to the attendee the most common radiographic lesions that are presented in infants, children and adolescents. The seminar will use case-presentation as the learning and discussion format and will cover the entire spectrum of oral radiology in pediatric dentistry. Topics such as oral pathology, imaging, and systemic conditions with implications in the practice of pediatric dentistry will be included..

Objectives:

After attending this seminar, the participant will be able to:

- Understand the importance of “building” a differential interpretation in radiology
- Learn the most common radiographic lesions in infants, children and adolescents.
- Learn the indications of CBCT within the frame of practicing pediatric dentistry
- Understand the importance of radiation safety in the practice of dentistry with children and adolescents
